Hallen, R.T., see Nelson, D.A. 11
Hirano, J., see Yamaguchi, S. 293

Isoda, Y., see Yamaguchi, S. 293

Jones, Jr., M., see Cutler, A.H. 223

Kimura, T., see Ohtani, H. 115
Koyama, T., see Nakagawa, H. 97
Kremer, J.H., see Liebman, S.A. 83
Krouse, H.R.
–, Ritchie, R.G.S. and Roche, R.S.
Sulphur isotope composition of H_2S evolved during the non-isothermal pyrolysis of sulphur-containing materials 19

Levy, E.J., see Wampler, T.P. 75
Liebman, S.A.
–, Snyder, A.P., Kremer, J.H., Reutter, D.J., Schroeder, M.A. and Fifer, R.A.
Time-resolved analytical pyrolysis studies in nitramine decomposition with a triple quadrupole mass spectrometer system 83

Magne, P., see Rodriguez, R. 301
Malacarne, P.
–, Billaud, F. and Baronnet, F.
Thermal decomposition of 3-methylpentane and *n*-hexane: reaction mechanism and correlations between structure and formation of light olefins 243
Martinez-Castro, I., see Paez, M. 31
Miyata, K., see Ohtani, H. 115
Montaudo, G., see Ballistreri, A. 3

Nagataki, Y., see Ohtani, H. 115
Nakagawa, H.
–, Tsuge, S. and Koyama, T.
Studies on thermal degradation of epoxy resins by high-resolution pyrolysis–gas chromatography 97
Nelson, D.A.
– and Hallen, R.T.
Thermolysis of alkylfuryl alcohols 11

Ohtani, H.
–, Kimura, T., Okamoto, K., Tsuge, S., Nagataki, Y. and Miyata, K.
Characterization of polyurethanes by high-resolution pyrolysis–capillary gas chromatography 115
Okamoto, K., see Ohtani, H. 115
Olano, A., see Paez, M. 31

Paez, M.
–, Martinez-Castro, I. and Olano, A.
Thermal degradation of different crystalline forms of lactose 31
Piskorz, J., see Radlein, D.St.A.G. 39, 51
Prókai, L.
Pyrolysis–mass spectrometric investigations of the mechanistic and kinetic aspects of thermal degradation of phenol–formaldehyde polycondensates 265

Radlein, D.St.A.G.
–, Grinshpun, A., Piskorz, J. and Scott, D.S.
On the presence of anhydro-oligosaccharides in the sirups from the fast pyrolysis of cellulose 39
Radlein, D.St.A.G.
–, Piskorz, J. and Scott, D.S.
Lignin derived oils from the fast pyrolysis of poplar wood 51
Reutter, D.J., see Liebman, S.A. 83
Ritchie, R.G.S., see Krouse, H.R. 19
Roche, R.S., see Krouse, H.R. 19
Rodriguez, R.
–, Magne, P. and Deglise, X.
Sugar cane bagasse as a feedstock for an industrial fast pyrolysis process under development 301

Schlotzhauer, W.S.
– and Chortyk, O.T.
Recent advances in studies on the pyrosynthesis of cigarette smoke constituents (Review) 193
Schroeder, M.A., see Liebman, S.A. 83
Schulten, H.-R.
Pyrolysis and soft ionization mass spectrometry of aquatic/terrestrial humic substances and soils 149
Scott, D.S., see Radlein, D.St.A.G. 39, 51
Severini, F., see Audisio, G. 135
Snyder, A.P., see Liebman, S.A. 83

Takahashi, R., see Tsukurimichi, E. 257
Tsuge, S., see Nakagawa, H. 97
Tsuge, S., see Ohtani, H. 115
Tsukurimichi, E.
–, Yoshimura, T., Takahashi, R. and Wakisaka, Y.
Pyrolysis of α-carbonyl-substituted cycloalkyl phenyl sulphoxides 257

Valenzuela-Calahorro, C.
–, Bernalte-García, A., Gómez-Serrano, V. and Bernalte-García, M^{a}J.
Influence of particle size and pyrolysis conditions on yield, density and some textural parameters of chars prepared from holm-oak wood 61

Wakisaka, Y., see Tsukurimichi, E. 257
Wampler, T.P.
– and Levy, E.J.
Reproducibility in pyrolysis. Recent development 75

Yamaguchi, S.
–, Hirano, J. and Isoda, Y.
Compositional analysis of acrylic thermosetting coatings by pyrolysis–gas chromatography 293
Yoshimura, T., see Tsukurimichi, E. 257

Subject Index

Alcohols, alkylfuryl
Thermolysis of alkylfuryl alcohols 11
Asphaltene
Sulphur isotope composition of H_2S evolved during the non-isothermal pyrolysis of sulphur-containing materials 19

Bagasse
Sugar cane bagasse as a feedstock for an industrial fast pyrolysis process under development 301
Biomass
Lignin derived oils from the fast pyrolysis of poplar wood 51
Biomass
Influence of particle size and pyrolysis conditions on yield, density and some textural parameters of chars prepared from holm-oak wood 61
Bis(5-alkyl-2-furyl)methane
Thermolysis of alkylfuryl alcohols 11
Bitumen
Sulphur isotope composition of H_2S evolved during the non-isothermal pyrolysis of sulphur-containing materials 19

Carbohydrates
Thermal degradation of different crystalline forms of lactose 31
Cellobiosan
On the presence of anhydro-oligosaccharides in the sirups from the fast pyrolysis of cellulose 39
Cellulose
On the presence of anhydro-oligosaccharides in the sirups from the fast pyrolysis of cellulose 39
Chars
Influence of particle size and pyrolysis conditions on yield, density and some textural parameters of chars prepared from holm-oak wood 61
Cigarettes
Recent advances in studies on the pyrosynthesis of cigarette smoke constituents (Review) 193
Coatings
Compositional analysis of acrylic thermosetting coatings by pyrolysis–gas chromatography 293
Combustion
Products of non-flaming combustion of poly(vinyl chloride) 275
Cyclotrimethylenetrinitramine
Time-resolved analytical pyrolysis studies of nitramine decomposition with a triple quadrupole mass spectrometer system 83

1,3-Dioxolane
Kinetics and mechanism of the vapor phase pyrolysis of 1,3-dioxolane in steam 223
Disaccharides
On the presence of anhydro-oligosaccharides in the sirups from the fast pyrolysis of cellulose 39
Disaccharides
Thermal degradation of different crystalline forms of lactose 31

Epoxy resins
Studies on thermal degradation of epoxy resins by high-resolution pyrolysis–gas chromatography 97
Ethyl phenyl sulphoxide
Pyrolysis of α-carbonyl-substituted cycloalkyl phenyl sulphoxides 257

Formaldehyde, polymers
Pyrolysis–mass spectrometric investigations of the mechanistic and kinetic aspects of thermal degradation of phenol–formaldehyde polycondensates 265
Fuels, fossil
Sulphur isotope composition of H_2S evolved during the non-isothermal pyrolysis of sulphur-containing materials 19
Fulvic acids
Pyrolysis and soft ionization mass spectrometry of aquatic/terrestrial humic substances and soils 149

Gas chromatography
Characterization of polyurethanes by high-resolution pyrolysis–capillary gas chromatography 115
Gas chromatography
Compositional analysis of acrylic thermosetting coatings by pyrolysis–gas chromatography 293

Gas chromatography
Pyrolysis–mass spectrometric investigations of the mechanistic and kinetic aspects of thermal degradation of phenol–formaldehyde polycondensates 265
Gas chromatography
Pyrolysis of poly-4-vinylpyridine: degradation mechanism and structural analysis 135
Gas chromatography
Reproducibility in pyrolysis. Recent developments 75
Gas chromatography
Studies on thermal degradation of epoxy resins by high-resolution pyrolysis–gas chromatography 97

n-Hexane
Thermal decomposition of 3-methylpentane and *n*-hexane: reaction mechanism and correlations between structure and formation of light olefins 243
Holm-oak
Influence of particle size and pyrolysis conditions on yield, density and some textural parameters of chars prepared from holm-oak wood 61
Humic acids
Pyrolysis and soft ionization mass spectrometry of aquatic/terrestrial humic substances and soils 149
5-Hydroxymethyl-2-methylfuran
Thermolysis of alkylfuryl alcohols 11

Isotopes
Sulphur isotope composition of H_2S evolved during the non-isothermal pyrolysis of sulphur-containing materials 19

Kinetics, reaction
Kinetics and mechanism of the vapor phase pyrolysis of 1,3-dioxolane in steam 223
Kinetics, reaction
Pyrolysis–mass spectrometric investigations of the mechanistic and kinetic aspects of thermal degradation of phenol–formaldehyde polycondensates 265
Kinetics, reaction
Pyrolysis of α-carbonyl-substituted cycloalkyl phenyl sulphoxides 257

Lactose
Thermal degradation of different crystalline forms of lactose 31
Lactose hydrate
Thermal degradation of different crystalline forms of lactose 31
Levoglucosan
Kinetics and mechanism of the vapor phase pyrolysis of 1,3-dioxolane in steam 223
Levoglucosan
On the presence of anhydro-oligosaccharides in the sirups from the fast pyrolysis of cellulose 39
Lignin
Lignin derived oils from the fast pyrolysis of poplar wood 51

Maltosan
On the presence of anhydro-oligosaccharides in the sirups from the fast pyrolysis of cellulose 39
Mass spectrometry
Analysis of polymers by mass spectrometry. Metastable mapping of transitions from pyrolysis products of an aromatic polyamide 3
Mass spectrometry
Pyrolysis and soft ionization mass spectrometry of aquatic/terrestrial humic substances and soils 149
Mass spectrometry
Pyrolysis–mass spectrometric investigations of the mechanistic and kinetic aspects of thermal degradation of phenol–formaldehyde polycondensates 265
Mass spectrometry
Pyrolysis of poly-4-vinylpyridine: degradation mechanism and structural analysis 135
Mass spectrometry
Time-resolved analytical pyrolysis studies of nitramine decomposition with a triple quadrupole mass spectrometer system 83
Metastable mapping
Analysis of polymers by mass spectrometry. Metastable mapping of transitions from pyrolysis products of an aromatic polyamide 3
3-Methylpentane
Thermal decomposition of 3-methylpentane and *n*-hexane: reaction mechanism and correlations between structure and formation of light olefins 243

Nitramine
Time-resolved analytical pyrolysis studies of nitramine decomposition with a triple quadrupole mass spectrometer system 83

Oak
Sugar cane bagasse as a feedstock for an industrial fast pyrolysis process under development 301

Oils
Lignin derived oils from the fast pyrolysis of poplar wood 51
Oligosaccharides
On the presence of anhydro-oligosaccharides in the sirups from the fast pyrolysis of cellulose 39
2-Oxocyclohexyl phenyl phenyl sulphoxide
Pyrolysis of α-carbonyl-substituted cycloalkyl phenyl sulphoxides 257
2-Oxo-3-methylcyclohexyl phenyl sulphoxide
Pyrolysis of α-carbonyl-substituted cycloalkyl phenyl sulphoxides 257

Phenol, polymers
Pyrolysis–mass spectrometric investigations of the mechanistic and kinetic aspects of thermal degradation of phenol–formaldehyde polycondensates 265
Pine bark
Sugar cane bagasse as a feedstock for an industrial fast pyrolysis process under development 301
Polyamides, aromatic
Analysis of polymers by mass spectrometry. Metastable mapping of transitions from pyrolysis products of an aromatic polyamide 3
Polymers
Analysis of polymers by mass spectrometry. Metastable mapping of transitions from pyrolysis products of an aromatic polyamide 3
Polymers
Characterization of polyurethanes by high-resolution pyrolysis–capillary gas chromatography 115
Polymers
Compositional analysis of acrylic thermosetting coatings by pyrolysis–gas chromatography 293
Polymers
Products of non-flaming combustion of poly(vinyl chloride) 275
Polymers
Pyrolysis–mass spectrometric investigations of the mechanistic and kinetic aspects of thermal degradation of phenol–formaldehyde polycondensates 265
Polymers
Pyrolysis of poly-4-vinylpyridine: degradation mechanism and structural analysis 135
Polymers
Studies on thermal degradation of epoxy resins by high-resolution pyrolysis–gas chromatography 97
Polyurethanes
Characterization of polyurethanes by high-resolution pyrolysis–capillary gas chromatography 115
Poly(vinyl chloride)
Products of non-flaming combustion of poly(vinyl chloride) 275
Poly-4-vinylpyridine
Pyrolysis of poly-4-vinylpyridine: degradation mechanism and structural analysis 135
Poplar
Lignin derived oils from the fast pyrolysis of poplar wood 51
PVC
Products of non-flaming combustion of poly(vinyl chloride) 275

Reaction mechanism
Characterization of polyurethanes by high-resolution pyrolysis–capillary gas chromatography 115
Reaction mechanism
Kinetics and mechanism of the vapor phase pyrolysis of 1,3-dioxolane in steam 223
Reaction mechanism
Pyrolysis–mass spectrometric investigations of the mechanistic and kinetic aspects of thermal degradation of phenol–formaldehyde polycondensates 265
Reaction mechanism
Pyrolysis of α-carbonyl-substituted cycloalkyl phenyl sulphoxides 257
Reaction mechanism
Pyrolysis of poly-4-vinylpyridine: degradation mechanism and structural analysis 135
Reaction mechanism
Thermal decomposition of 3-methylpentane and *n*-hexane: reaction mechanism and correlations between structure and formation of light olefins 243
Reproducibility
Reproducibility in pyrolysis. Recent developments 75
Resins
Compositional analysis of acrylic thermosetting coatings by pyrolysis–gas chromatography 293

Smoke, tobacco
Recent advances in studies on the pyrosynthesis of cigarette smoke constituents (Review) 193
Soil profiles
Pyrolysis and soft ionization mass spectrometry of aquatic/terrestrial humic substances and soils 149

Sugar cane
Sugar cane bagasse as a feedstock for an industrial fast pyrolysis process under development 301
Sulphur
Sulphur isotope composition of H_2S evolved during the non-isothermal pyrolysis of sulphur-containing materials 19

Thermal degradation
Pyrolysis of poly-4-vinylpyridine: degradation mechanism and structural analysis 135
Thermal degradation
Studies on thermal degradation of epoxy resins by high-resolution pyrolysis–gas chromatography 97
Thermolysis
Thermolysis of alkylfuryl alcohols 11

Tobacco
Recent advances in studies on the pyrosynthesis of cigarette smoke constituents (Review) 193

Whole soils
Pyrolysis and soft ionization mass spectrometry of aquatic/terrestrial humic substances and soils 149
Wood
Influence of particle size and pyrolysis conditions on yield, density and some textural parameters of chars prepared from holm-oak wood 61
Wood
Lignin derived oils from the fast pyrolysis of poplar wood 51
